**Unified Mobile App Defense** 

### **BETTER MOBILE ATO PREVENTION IN CI/CD**

Continuously build, test, monitor and respond with Mobile ATO Prevention and 340+ other defenses in Android & iOS mobile apps in one platform in CI/CD.

Mobile DevOps pipelines use systems to drive rapid, automated and continuous integration, delivery and release cycles of Android & iOS apps. Appdome's Unified Mobile App Defense platform lets you do the same, using a factory model to build, test, monitor and respond with ATO Prevention in mobile apps, fast. Here's what you get by combining Appdome with CI/CD:

### **RAPID RELEASE & DELIVERY, MOBILE ATO PREVENTION**

Getting mobile ATO prevention in mobile apps right requires releasing dozens of unique defenses in Android and iOS apps fast. With Appdome, you do just that. Instead of needing engineering resources and work, you build mobile ATO prevention features in Android and iOS apps on-demand. From the CI/CD, trigger the build command in Appdome and release mobile ATO prevention in mobile apps either all at once or in an iterative release process to respond to new threats as they emerge and instantly match the needs of the business.

#### CONTINUOUS SECURITY FOR MOBILE APPLICATIONS

Mobile apps, operating systems, and the coding languages used for them constantly change. Mobile apps regularly add and update new APIs, frameworks, and capabilities. Appdome automatically adjusts and adapts each mobile ATO prevention feature to these changes with each release. No manual work, retooling, or coding changes are needed to implement mobile ATO prevention features in the updated app. Appdome handles this for you, providing continuous security across all mobile app versions and releases with ease.

#### **CONTINUOUS DETECTION & RESPONSE**

DevOps requires real-time data and feedback on each iterative release of a mobile app. Appdome provides real-time data and feedback on each mobile ATO prevention and other defenses in the mobile app. With Appdome, mobile brands and organizations monitor all attack vectors impacting the mobile app, revealing the impact of each defense and the total active attack surface in real-time. Armed with this data, brands click-to-add new defenses or update enforcement models in existing defenses to keep the mobile app, business, and users safe.

#### **COMPLIANCE TRANSPARENCY & CONTROL**

Continuous compliance, transparency, and control over each step of the build, test, and release lifecycle for mobile apps and defenses alike is critical. Without Appdome, compliance is a leaky bucket, and gaps arise. Appdome provides enterprise-grade (1) access, version, and change control, (2) role-based and team entitlements, and (3) tracking for each mobile defense choice, change, detection, and enforcement event. Build by build, each mobile app is Certified Secure<sup>™</sup> compliant in the CI/CD pipeline.

#### **"BEST OF SUITE" COST SAVINGS & CONSOLIDATION**

Appdome offers unparalleled cost consolidation and TCO savings for mobile ATO prevention and other defenses in mobile apps. Appdome delivers mobile ATO prevention features without resource dependencies or compatibility limitations. In addition, features are instantly interoperable with 340+ other defenses offered via the Appdome platform. Eliminate point products, multi-vendor integration risk, complexity, and streamlining release cycles for mobile apps and defenses.

#### FULL MOBILE ATO PREVENTION FEATURE COVERAGE

Mobile ATOs involve various abuses like spyware, overlays, Trojans, Remote Access Trojans (RATs), credential stuffing, keyloggers, facial recognition bypasses, and other non-human methods to create fake events, accounts, and transactions. Appdome provides comprehensive protection against mobile ATOs, including:

- **Prevent Malware & Trojans:** Detect and block malware, RATs, and other Trojans remotely taking over apps, devices, and accounts.
- **Prevent Accessibility Abuse:** Detect and block malware that abuses accessibility services and permissions.
- **Overlay Attack Prevention:** Block malicious overlays that cover parts of the mobile app screen and trick users into revealing confidential information.
- Anti-Spyware: Block spyware, keyloggers, and injection attacks designed to steal data.
- **Prevent Credential Stuffing:** Block credential stuffing attacks and malicious bots, ensuring only legitimate mobile connections can connect.

Mobile ATO protections are often part of a larger mobile app defense strategy. Combine the above mobile ATO prevention features with any or all of Appdome's 340+ other mobile app defenses, including mobile app security, anti-cheat, anti-bot, geo compliance, social engineering prevention, and more.

## ONE SOLUTION FOR ALL YOUR MOBILE APP DEFENSE NEEDS

Appdome's Unified Mobile App Defense platform provides a one-stop shop to protect your mobile apps, save money on mobile app defense, and deliver beautiful user experiences when attacks happen.

#### **THREATSCOPE™ MOBILE XDR**

ThreatScope<sup>™</sup> Mobile XDR provides mobile brands, developers and cyber professionals extended detection and response (XDR) for Android & iOS apps. ThreatScope Mobile XDR uses dedicated sensors inside mobile apps, not a separate agent or app on the end user's mobile device. These sensors provide real-time, continuous monitoring of 1000s of unique attack vectors, giving mobile brands real-time visibility into the entire range of threats and attacks impacting their mobile app and users. As an XDR, ThreatScope also provides the power to respond to attacks instantly build-by-build, and release-by-release. Inside ThreatScope, organizations can (1) see and analyze the top mobile app threats and attacks impacting the mobile channel, (2) prove the value of the Appdome defenses deployed in mobile apps (3) make data-driven decisions of what protections to deploy in each release, and (4) create customized views and comparisons to report on threats and attacks impacting different parts of the mobile business.

#### **UNIFIED MOBILE APP DEFENSE**

Appdome's patented Unified Mobile App Defense platform provides mobile developers, cyber-security and fraud teams a centralized automation, monitoring and control center for protecting mobile apps. With Appdome, choose, build, test, release and monitor any or all of Appdome 340+ mobile app security, anti-fraud, anti-malware, anti-cheat, anti-bot, geo compliance and other defenses in Android or iOS apps with ease. Maintain full compliance control over the defense lifecycle and enjoy complete compatibility with the entire tech stack used in mobile development, DevOps, and DevSecOps.

#### **THREAT-EVENTS™ CONTROL FRAMEWORK**

All of Appdome's runtime and dynamic protections come enabled with Threat-Events<sup>™</sup>, Appdome's in-app attack intelligence and control framework. Threat-Events empower developers to read/write from the Appdome Security Framework<sup>™</sup>, gather data on each attack inside the app, and use the detection and defense data to deliver beautiful user experiences when attacks are detected.

### **CERTIFIED SECURE™ DEVSECOPS CERTIFICATION**

Build-by-build, mobile apps are Certified Secure<sup>™</sup> to guarantee the mobile app security, anti-fraud, anti-malware, anti-cheat, anti-bot, geo compliance, social engineering prevention and threat intelligence features are embedded, active and protecting the mobile app. Cyber-security and mobile dev teams use Certified Secure<sup>™</sup> as a continuous record of compliance and as the DevSecOps artifact to clear mobile apps for release and save money and time vs. using code scans and pen tests in the release process.

#### **ABOUT APPDOME**

Appdome is the mobile app economy's one-stop shop for mobile app defense. Appdome is on a mission to protect every mobile app in the world and the people who use mobile apps in their lives and at work. Appdome provides the mobile industry's only fully-automated, Unified Defense Platform, powered by a patented coding engine, used by mobile brands to eliminate complexity, save money and deliver 300+ Certified Secure<sup>™</sup> mobile app security, anti-malware, anti-fraud, MOBILEBot<sup>™</sup> Defense, Geo Compliance, anti-cheat, MiTM attack prevention, code obfuscation and other protections in Android and iOS apps with ease, all inside the mobile DevOps and CI/CD pipeline. Appdome's Unified Mobile App Defense platform also comes with Threat-Events<sup>™</sup> for UX/UI Control and ThreatScope<sup>™</sup> Mobile XDR. Leading financial, healthcare, mobile games, government and m-commerce brands use Appdome to protect Android and iOS apps, mobile customers and mobile businesses globally.

Appdome holds several patents including U.S. Patents 9,934,017 B2, 10,310,870 B2, 10,606,582 B2, 11,243,748 B2 and 11,294,663 B2. Additional patents pending.
